1 Typesetting instructions - Summary

LIPICs¹ is a series of open access high-quality conference proceedings across all fields in informatics established in cooperation with Schloss Dagstuhl. In order to do justice to the high scientific quality of the conferences that publish their proceedings in the LIPICs series, which is ensured by the thorough review process of the respective events, we believe that LIPICs proceedings must have an attractive and consistent layout matching the standard of the series. Moreover, the quality of the metadata, the typesetting and the layout must also meet the requirements of other external parties such as indexing service, DOI registry, funding agencies, among others. The guidelines contained in this document serve as the baseline for the authors, editors, and the publisher to create documents that meet as many different requirements as possible.

Please comply with the following instructions when preparing your article for a LIPICs proceedings volume.

Minimum Requirements

- Use pdf_latex and an up-to-date LATEX system.
- Use further LATEX packages and custom made macros carefully and only if required.

2 LIPlcs Typst Template

- Use the provided sectioning macros: section, subsection, subsubsection,
- paragraph, paragraph, and subparagraph (for more details, see Section 2.4).
- Provide suitable graphics of at least 300dpi (preferably in PDF format).
- Use BibTEX and keep the standard style (plainurl) for the bibliography.
- Please try to keep the warnings log as small as possible. Avoid overfull hboxes and any
- kind of warnings/errors with the referenced BibTEX entries.
- Use a spellchecker to correct typos.
